This lesson includes 15 additional questions for subscribers. HOME LEARNING - SUMMER TERM WEEK 6 - SCIENCE THE HUMAN SKELETON - STRUCTURE & FUNCTION Our science topic for the second half of the summer term is 'Human Skeleton and Movement', where we aim to discover what the human skeleton is for and how it helps in protection and movement. Use the links below to watch the videos and look at the website links for information about types of skeleton and bones. You may already know the answers or need to Google or 'Ask Alexa'. There is an answer sheet to talk through your ideas and check your answers. TASK 2 - Skeleton Labeling and Fill in the Gaps Sheet Label the parts of the skeleton (use the pictures in the slideshow to help you) and then put the answer words into the correct gap. TASK 3 - Build Your Own Skeleton There are 10 templates to choose from, all different styles and sizes. Print one off and build your own skeleton. If you have split pins (or something similar) you can even make the arms and legs move! Checkout securely using your preferred payment method Challenge your children to learn and then label all of the different bones on this Human Skeleton Worksheet! Looking for ready-to-teach Science lessons? Check out our Health and Movement KS2 scheme, which includes lessons on skeletons, how they support and protect us, and how muscles help us to move. A KS3 resource to explain the structure and function of the skeleton, perfect for the movement topic. It includes a diagram of the skeleton for students to label. The final slide is an application challenge to get students thinking about the consequences of a serious break whilst still growing. To accompany the presentation is a worksheet which has the skeleton diagram and a set of questions. The answers are included. There are no reviews yet. Have you used this resource? When you are learning about the human body, there are many types of body systems to learn and remember. There's the muscular system. Another one of these body systems is the skeletal system. So if you need some free skeletal system worksheets, you'll find the sheets you need here! The skeletal system is the body's framework consisting of bones and connective tissue. It also protects all of our vital organs. Human skeleton begins with 270 bones at birth. By adulthood, some of the bones have fused together leaving only 206 bones in the human adult. These bones can be divided into two groups: the axial skeleton and the appendicular skeleton. The axial skeleton includes the 80 bones along the body's vertical axis such as the rib cage, spine, and skull. It provides protection and support for the spinal cord, brain, and internal organs such as the stomach, lungs, and heart. The appendicular skeleton is made up of the remaining 126 bones that attach to the axial skeleton. These include the shoulder blades, leg bones, hip bones, and upper arm bones. If you are learning about the human body in your science studies, your children are going to have a lot of fun learning about the skeletal system. There are over 200 bones that makeup the human body and many things to learn and to remember! I have put together a list of tons of free worksheets to accompany any study on the human body, or to do a specific unit study on the skeletal system. This post is part of the FREE Human Body Systems Worksheets to accompany any study of the skeletal system. the skeletal system. You'll find labeling sheets, build-your-own-skeleton, puzzles, and more. Skeletal System Worksheets for Kids – These skeletal system worksheets are perfect for younger kids. These sheets will help your kids learn the different bone names. Human Skeleton Printables – This pdf file includes worksheets to review the names of the bones, a fill-in-the-blank page, and a build-your-own-skeleton. Learning About Bones Printables – You'll also find some fun activities to learn about the skeletal system, but you'll also find some fun activities to learn about the skeletal system, but you'll also find some fun activities to learn about the skeletal system, but you'll also find some fun activities to learn about the skeletal system, but you'll also find some fun activities to learn about the skeletal system, but you'll also find some fun activities to learn about the skeletal system. skeletons? Then look no farther. You'll find a print-out for an adult human skeleton as well as a print-out for a child. Plus, there are word puzzles, jumble puzzles, and worksheets to learn about teeth. Labeling the Bones Labeling and diagramming the skeletal system is a great way to memorize the important parts of this system. We have created the Human Body Systems Labeling and Diagramming Worksheet as an instant download. This includes fill-in-the-blanks for your student to label the main bones on the body. Be sure to scroll down and you'll find worksheets to learn the cranial bones along with the facial bones. Printable Label a Skeleton Worksheets - These skeleton worksheets are a great addition to your lesson plans. They're kid-friendly and not only help kids label a skeleton, but they also walk kids through learning about the different parts of the skeletal system.
